## FIELD SERVICE TECHNICIAN

**Vector Systems, Inc.** is a manufacturer of skid-based equipment and is looking to hire a Field Service Technician.

**Summary:** An understanding of mechanical systems, piping and instrument diagrams, and the ability to understand mechanical, electrical, & fabrication drawings is highly desired.

### **Essential Duties and Responsibilities include the following:**

- Travel (Up to 70%) performing field service support:
  - Startup and commissioning service.
  - Warrantee service.
  - Customer requested changes and modifications.
  - Preventive Maintenance.
  - Retrofit implementation.
- Be familiar with the customer's project specifications and control philosophies.
- Maintain detailed working knowledge of the PLC, programming and controller platforms used by Vector Systems.
- Maintain working knowledge of industry requirements required to perform your duties.
- Maintain data base and programming software products used by Vector Systems.
- Write, upload, and debug process control programs for PLC and controller based control projects to emulate the logic diagrams provided by the engineering department. (3 years, minimum).
- Review control logic drawings and provide suggested changes to provide the best possible control.
- At Quality Manager direction perform FAT on process packages (in-shop)
- Maintain equipment and tools required to perform your duties.
- Upsell Contracts and parts
- Follow OSHA and Safety guidelines in the manufacturing environment.
- Any other duties as assigned by the Vice President of Vector Services.

### **Education / Experience:**

- College Degree or Equivalent Experience
- Experience working in a manufacturing environment using mechanical & Electrical Systems
- Experience with instrumentation and 480-600 VAC, 3 phase power control. (2 Years, minimum)
- History of good attitude and work ethic
- Attendance is a top priority

### **Knowledge / Skills:**

- Strong communication and interpersonal skills.
- Spreadsheet and word processor proficient.
- Allen Bradley platform knowledge as minimum, GE, Siemens, and others a bonus.

### **Other Information:**

- Must have (or willing to get) COVID 19 vaccination due to out of country & site requirements.
  - Must be able to pass random drug tests and background checks.
  - Willing to train the right candidate if some qualifications can be met.
  - Salaried Position is DOE, please submit desired range. With Field Overtime.
  - Relocation – preferred but not required.
  - Job Type: Full-time
-
