For Immediate Release

McKinney, TX – April 26, 2023 – Vector Systems, Inc., a Texas corporation is announcing that Vaughn Watson will be taking on its position of Director of Marketing & Sales.

He is a retrofit specialist and very knowledgeable in process control equipment applications.

With nearly 20 years of hands-on experience in design, sizing, application, engineering, and installation of Environmental Air Pollution Abatement technologies Vaughn is widely regarded as a Subject Matter Expert in SCR Process Equipment. In addition to his technical experience, Vaughn is also an experienced sales team growth leader, with a track record of implementing proven systems and streamlining organizational revenue growth thru customer-centric technical sales.

He regularly speaks at turbine user's groups to educate and advise plants operators of maintenance and environmental concerns throughout the industry.

Vaughn earned a Bachelor of Science in Mechanical Engineering from University of North Texas, as well as holds multiple technology patents on Ammonia injection designs.
